RE: ADECA RTP Grant for FY 2017-2018
GRANT REQUEST: \$120,000

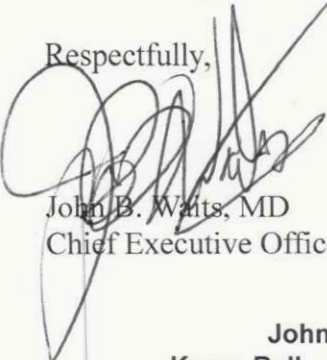

Dear Ms. Davis:

Cahaba Medical Care Foundation is submitting the attached Pre-Application for the ADECA RTP Grant for FY 2017-2018. This application is for the non-motorized diverse trail, which has a grant ceiling of \$200,000. The project will consist of renovating, expanding, and extending the Centreville Walking Trail from Walnut Street to Riverview Road in Centreville, AL. The total amount of the project is **\$150,000**. The grant fund request is **\$120,000** and the remaining **\$30,000** is the 20% local match funds.

The grant application has been thoroughly reviewed and is accepted by our administrators. All required documentation has been attached.

Thank you in advance for considering our application. We look forward to hearing from you in the upcoming month.

Respectfully,

John B. Waits, MD
Chief Executive Officer

Project Descriptive Narrative

Provide a brief, yet informative, description of the proposed project; address each evaluation criterion on the following pages (provide additional narrative and documents as may be needed to support your response to each evaluation criterion); and include a cost estimate, a preliminary site plan, plat and/or legal description, and location map.

Project Information

Name of Project: Centreville Walking Trail Renovation & Expansion

Trail Length in Linear Feet (L.F.): 3168 Trail Width: 6 ft

Trail Surface Type: asphalt

Application Type: ☐ Non-motorized for a Single Use ☐ Motorized
☒ Non-motorized for Diverse Use ☐ Educational

Type of Applicant: ☐ City/Town ☐ County
☐ State ☒ Private Organization

Total Estimated Project Cost	\$ <u>150,000</u>
Grant Amount Requested	\$ <u>120,000</u>
Total Local Match	\$ <u>30,000</u>
Cash Match	\$ <u>10,000</u>
In-Kind Match	\$ <u>15,000</u>
Donation	\$ <u>15,000</u>

Brief Description of the Project:

Funds will be used to renovate, expand, and extend an existing walking trail along the Cahaba River in Centreville, AL. Through the project, the current trail will be widened for non-motorized, diverse use (walking/jogging/cycling), resurfaced and renovated, and extended through Shayne Williams Park, Park Dr., to Riverview Dr., Centreville, AL.

Please address each evaluation criterion and insert your answers below each (120 Total Available Points).

- 1. Describe the degree to which the project's scope and feasibility meet the project area's recreational needs. (Key Consideration: Does the project appear to be feasible and incorporate a good project design with consideration given to the natural and cultural environment in which the project is located, and appropriate consideration given to needs and benefits?) 10 Points Available**

The proposed project's scope and feasibility meet the recreational needs of the community of Centreville, Bibb County, AL, which is located in Region 2. According to the 2013-2018 SCORP Walking for Pleasure is ranked 1 and

Walking/Jogging Trails are ranked 2 in terms of what the people of the community feel is needed in Region 2.

The project design maximizes the potential of the current trail by taking into consideration the natural habitat that is characteristic of the scenic Cahaba River, which flows alongside the trail. In addition, the new design provides ease of access for the elderly and those with disabilities. Research has shown that outdoor activity promotes a healthy body and a healthy mind. The trail is an outlet for promoting a healthy lifestyle, which in return will promote a healthy community.

2. Describe the ways in which the project provides for the greatest number of compatible recreational purposes. (Key Consideration: An important concern is that this project will enhance the quality and quantity of recreational trail opportunities available in the community or region. Maximum points will be given to projects with connectivity to other trails or parks, environmental education and preservation, and economic development opportunities.) **10 Points Available**

Walking, running, and cycling are activities that have become very popular in the community. However, there are limited trails in the community. The Centreville Walking Trail and the City of Brent Walking Trail are the only ones within 10 miles. The re-design of the trail through expansion and diversification of use makes the trail more acceptable to the culture of the community. In addition, the re-design accounts for handicap accessibility; thereby, providing a local outlet for those with disabilities to view the natural habitat of the beautiful Cahaba River.

The trail is a setting for walking, running, physical conditioning, and sitting alongside the banks of the Cahaba River. It is not only used by the residents of the community, but it is also used by the local high school, the local track club, healthcare facilities, educational programs, etc. By diversifying the use of the trail, other organizations will have a new location for activities.

The Bibb County Board of Education has stated that with the renovation of the trail, professional funds will be allocated for educators to use the trail for educational purposes, particularly for the study of the natural terrain along the Cahaba River.

Also, the re-design of the trails also ties the current trail into Shayne Williams Park, which is currently under re-construction to make it ADA-accessible and compliant to playground safety standards. In addition, the new trail path will connect the trail to local residential communities, local businesses, healthcare facilities, senior citizen housing, and the local little league baseball field.

3. Describe the ways in which the project provides a new, unique, or more effective means for making trail opportunities available to the public. (Key

Consideration: This criterion includes projects of national, regional, and local demonstration value. The most important concern is whether the grant recipient is committed to trying an approach that is new at the local level. Additional points are awarded for nationwide applicability and statewide or regional value. The applicant must commit to documenting the results of the demonstration.) **10 Points Available**

Before undertaking this project, Cahaba Medical Care Foundation staff researched areas across the country to determine if similar organizations had been successful in undertaking projects like this one. Most of the research indicated that successful projects had been undertaken in urban communities that were moving towards "sustainable communities." However, coming from a rural perspective, there are considerably more challenges. Looking at the success of the recreational trails programs across the state, CMC staff began developing a plan that included the renovation of the Centreville Walking Trail and converting it into a diverse-use trail.

This project affords the residents of the community the opportunity to have a recreational trail comparable to other trails across the state that are developed in more remote areas. The uniqueness of the City of Centreville, that is having the Cahaba River, a natural wonder in its own rights, flow through the heart of the City, provided the ideal setting for this venture.

From a private, nonprofit perspective, this project in itself is unique especially since we do not own the property. We are reaching beyond the confines of our organization to provide a service that will benefit the entire community and possibly draw others to the community.

Using data that will be tracked by our organization through interaction with patients, other residents, and local officials, we will determine the success of the project with the intentions of incorporating similar projects in other communities we serve across the state.

4. Describe the ways in which the project facilitates the access and use of trails by persons with disabilities, older citizens, economically disadvantaged, and other special populations or groups. (Key Consideration: Whether this project will expand recreation opportunities for special populations with recreation deficiencies.) **10 Points Available**

Having worked with other agencies that are working to address the need for ADA-accessible facilities and recreational opportunities, this project is in line with others projects that are being implemented in the community. More specifically, the connection of the trail to the Shayne Williams Park will provide a right-of-way for people with disabilities to access the walking trail. The redesign of the trail will make the trail more user friendly for people with disabilities and the elderly. In addition, the connection of the trail to the

residential communities to the north will provide an access point that can be used by residents of the nursing home, healthcare facilities, and local residents. The trail will also provide a venue where the low-income patients that Cahaba Medical Care serve can become engaged in physical activity at no additional cost.

5. Describe the ways in which the project creates opportunities for new partnerships between trail users, private interests, and public agencies within the project area. (**Key Consideration:** The major concern is that this project is a component of an integrated effort to enhance economic revitalization and community conservation. Maximum points will be given to applicants providing evidence of cooperative efforts with trail user groups and/or multiple public meetings.) **10 Points Available**

The attached letters of support show that this project is part of a vast undertaking of various groups in the community to enhance economic revitalization and community conservation. It is a common consensus from the local government, private agencies, and Cahaba Medical Care Foundation that this effort is not a project for only one organization to undertake. Through partnerships and collaborations with other parties, we feel that through our joint efforts this project will be a success.

In addition, the renovation to the trail will also be beneficial to the local schools. If the grant is awarded, the Bibb County School Board has proposed to provide professional fees to educators to use the trail as an access point to the Cahaba River for educational purposes.

6. Describe the ways in which the project uses the grant funds to leverage other public or private investments (in the form of services and materials as well as dollars). (**Key Consideration:** The major concern is whether actual leveraging is assured or the potential for leveraging is good, outside of any funds committed for the initial grant match. Maximum points will be given for applicants committing double the minimum local match or higher.) **10 Points Available**

The letters of support from the City of Centreville and the Bibb County Board of Education acknowledges their support for this grant application. As previously mentioned, the trail is located on land owned by the Bibb County Board of Education who has graciously given us permission to upgrade the trails on their property.

As noted above, the City of Centreville is offering valued support for this project. In recent discussions with Mayor Terry Morton of the City of Centreville, the City will provide equipment and labor to expand the length of the trail and clear layers of debris to enable the widening of the existing trail to accommodate a diverse use trail. Based on the quote received from the proposed contractor, the estimate of the match is \$30,000, which

includes both equipment and labor.

As part of matching funds for this grant, Cahaba Medical Care Foundation will provide a cash match of \$10,000

7. Describe the degree of commitment to continue operation and maintenance of the project. Include an operation and maintenance plan detailing the amount of money needed to operate and maintain the trail after it is completed and identify who will be responsible for the work. (Key Consideration: Whether the grant recipient is willing to commit to continue the maintenance and operation of the project and whether the applicant provides a realistic operation and maintenance plan/budget. Additional points will be awarded to applicants demonstrating innovative funding measures for trail maintenance.) **10 Points Available**

The City of Centreville has agreed to maintain the recreational trail for the benefit of its citizens. This is a long term commitment by the City to ensure the trail remains a viable place for running, walking and bicycling for many years to come. The city has committed to maintaining and operating the trail by allocating 40 hours/week of city employee time. Budgeted expenses for the operation and maintenance of the trail are estimated as follows:

Salary- 40 hours/week at \$15/hour	\$ 600.00
Social Security Matching @ 7.65%	45.90
Total Weekly Costs	645.90
Total Annual Labor Costs	\$33,586.80
Total Annual Equipment Costs	\$ 5,000.00
Total Cost of Labor and Equipment	\$38,586.80

Because the trail will be used by the Board of Education for various educational program, we are budgeting a donation of labor of an additional \$6,000 per year for the students to assist in clean-up and maintenance of the trail.

8. The degree to which community involvement is addressed: i.e., (A) Project idea originated with trail users or a community group that has substantial knowledge, and (B) The private sector (including individual citizens, community groups, or local business enterprises) has participated in the development of the proposed idea and has made commitments of labor, money, or materials to support proposed implementation. (Key Consideration: The objective is to determine if the project is responding to citizen-identified needs. The priority of the project to users is evidenced by citizen support for the idea. Additional points will be awarded to applicants demonstrating that the project concept was originally proposed at the grassroots level and, especially, for extensive citizen or private organization involvement in project development and support in project implementation. Maximum points will be awarded to applicants

demonstrating extensive involvement and participation from citizens and interest groups during all phases of application development and commitments beyond.) **10 Points Available**

The Centreville Walking Trail is located on the property of the Bibb County Board of Education. The existing trail has been in existence for a number of years. Lack of proper maintenance and the current design of the trail has resulted in a decline in use. The trail, however, is still utilized by a large number of people from the local population.

Beginning in July, 2014, Cahaba Medical Care Foundation, a not-for-profit Federally Qualified Health Center, began using the trail for its 5K run. Since that time, Cahaba Medical Care has sponsored this 5K run annually with over 75 people participating in its latest run. Seeing the poor condition of the trail but realizing the potential benefits to the citizenry of the city and county, Dr. John Waits and Dr. Lacy Smith, who are the principals at Cahaba Medical Care, asked their outreach team to discuss with Bibb County Board of Education and the City of Centreville a means to improve the trail. Based upon this directive, we are hereby applying for this grant.

Having had years of experience in managing federal grant funds, it is the desire of the administrators of Cahaba Medical Care Foundation to actively monitor the progress of the grant and to be the primary agent for overseeing the distribution of the grant funds in accordance with the grant requirements. In addition, as noted above the City of Centreville and the Bibb County Board of Education have pledged time, labor, and equipment in an effort to show support of the project.

9. Describe in detail how the trail will be managed. Include discussion on season length, hours of operation, limitations on use, enforcement provisions, and scheduling. **10 Points Available**

The City of Centreville will manage the trail with limited oversight from Cahaba Medical Care Foundation. Because of the location of the trail near the Cahaba River, there are guidelines that have to be maintained to preserve the natural environment. The City has been diligent in ensuring these guidelines are enforced. The city cuts the grounds around the trail and the Shayne Williams Park. They also provide daily clean-up of the grounds and surveil the property for violators. During the summer months when vegetation grows more quickly, the City will apply nontoxic herbicides to deter the growth of the vegetation. In addition, noting that asphalt has a lifespan of 5 – 15 years depending upon use, the City will monitor the trail and perform patchwork and remove debris as needed.

The trail will be open all 12 months of the year with hours of operation 5:00 a.m. – 10:00 p.m. The trail is open to the public at no cost. Special events will

be scheduled through the City so that adequate provisions can be made for use.

10. Identify and describe the service area of the project. Approximately how many people do you propose to serve with this project? Identify other trail resources in the service area by trail type (motorized, non-motorized, multi-use), distance, location in relation to the proposed trail, and ownership. (**Key Consideration:** The RTP was created to address trail needs in the urban and rural areas of the state. In order to assess the need for additional trails it is first necessary to identify the quantity and location of existing resources within the service area. It is also necessary to establish a service area – either population or resource based. For example, a population based service area could be a neighborhood, school district, or political jurisdiction whereas, a resource based service area might be defined along a linear greenway, water course, or unique natural/cultural area. However, in both instances, an estimate of the number of beneficiaries should be provided.) **10 Points Available**

The proposed service area for the project is population- and resource-based. As noted, the trail will be used by local residents, schools, private organizations, businesses, and special interest groups who are interested in the natural habitat of the Cahaba River. The trail could quite possibly be visited by 2000+ unique individuals per year with approximately 50% of those users being repeat users.

As noted previously, there are limited trails in the county. Those in closest proximity include:

1. The City of Brent Walking Trail is located approximately 2 miles to the west of Centreville. The trail is a non-motorized, single-use trail walking trail with crushed gravel surfacing. It has a large and small walking course. The length of the trail is not specified.
2. The Cahaba River Trail is located approximately 10 miles to the north in West Blocton. The non-motorized trail is a 2.5 mile out-and-back trail that runs through the Cahaba River Wildlife Refuge. It is used primarily for hiking. It has gravel surfacing and is handicap-accessible.

11. Identify the length of time the trail will be maintained and open and available to the public and identify the method to be used to ensure this commitment (deed covenant, deed restriction, etc.). (**Key Consideration:** The objective is to utilize RTP funds to the greatest extent possible by ensuring the improvements are maintained and available for public trail use as long as possible. Points will only be awarded to applicants exceeding the minimum required timeframe for a trail development project to remain open to the public. Maximum points will be awarded to applicants electing to maintain the improvements in perpetuity.) **15 Points Available**

If awarded, the Bibb County School Board will grant a letter of easement in perpetuity for the use of the trail.

12. The Universal Trail Assessment Process (UTAP) and the High Efficiency Trail Assessment Process (HETAP) are methods of obtaining and recording objective data related to outdoor, natural environments. They are tools that land managers, agencies, and individuals can utilize to learn about, monitor, improve, and encourage the safe and enjoyable use of any outdoor path of travel. Points are available to project sponsors committing to the assessment of the trail and installation of Trail Access Information signage. (Key Consideration: The assessment of trail conditions for accessibility and maintenance is an eligible RTP project cost and can be included in the project budget. For projects such as the development of trailhead and trailside facilities, points may still be obtained if the sponsor commits to the assessment of the trail(s) for which the support facilities are being constructed.) **5 Points Available**

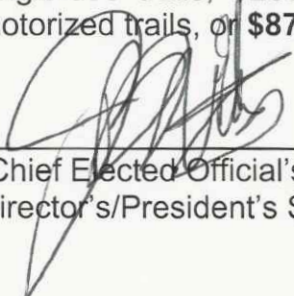

Not at this time.

NOTE: Property acquired with RTP funds must remain open to the public in perpetuity. Should the property cease to be open to the public for trail use, the applicant must repay the RTP 80% of the fair market value of the property at the time of the change in use. If the project is located on an easement or on leased land, the minimum timeframe for the easement or lease is 25 years. The project must remain open for public access for the use for which the RTP funds were intended during that time. For development projects on applicant owned property, the project must remain open for public access for the use for which the RTP funds were intended for a minimum of 25 years.

Total Project Cost: \$150,000

Funds Requested: \$120,000

Important Note: The maximum grant amount by trail type is **\$70,000.00** for non-motorized, single-use trails; **\$200,000.00** for non-motorized, diverse-use trails; **\$500,000.00** for motorized trails, or **\$87,489.00** for education projects.

(Date)

Additional Narrative/Explanations:

Accompanying documentation: Plat/Legal description of property

Due to the trail being located on property owned by the Bibb County Board of Education, the section of the property that contains the trail is not defined on the documents housed by the Bibb County Tax Assessors' office (see attached Plat document).

The property of concern runs from South to North from the Bibb County Chamber of Commerce, 835 Walnut Street, Centreville, AL to Riverview Road. The current trail is currently 4 feet wide and runs approximately .5 mile along the Cahaba River. With the trail extension through Shayne Williams Park to Riverview Road, the trail will be .6 miles with a width of 6 feet.

CERTIFICATION OF BOARD RESOLUTION

This document evidences actions taken by an electronic vote of the Board of Directors ("Board") of Cahaba Medical Care Foundation (the "Corporation") on January 5, 2017.

Whereas, the Board was asked to approve submission of a proposal for the ADECA Recreational Trails Program grant and to authorize and commit the \$30,000 of matching funds required to complete the project described in the proposal. A majority of directors have voted electronically to approve the motion to submit the grant proposal and to authorize and commit the funds described above.

It is resolved that the Board confirms its approval to submit the proposal for the ADECA Recreational Trails Program grant and to authorize and commit the \$30,000 of matching funds required to complete the project described in the proposal. The Corporation's Board Chair is directed to submit this resolution along with the Corporation's ADECA Recreational Trails Program Grant proposal.

In witness whereof, the undersigned has executed this instrument to evidence the actions taken by the Board of the Corporation on January 5, 2017.

Narrative

Cahaba Medical Care Foundation is seeking funding from the ADECA Recreational Trails Program to renovate, expand, and extend the Centreville Walking Trail in Centreville, AL. The Centreville Walking Trail is a .5 mile non-motorized, single-use asphalt trail that extends from Walnut Road to the South to Park Road to the North. The trail runs alongside the Cahaba River.

We are proposing to expand the width of the current trail from 4 feet to 6 feet and to extend the trail approximately 1250 feet through Shayne Williams Park and connect to Riverview Road. The extension to the trail will cut through Shayne Williams Park at the fence near the right field zone of the old little league field and connects to Riverview Road and progresses north past the pavilion through the wooded area and reconnects to Riverview Road to the North. The redesigned trail will be a non-motorized, diverse use trail that will be used for walking, jogging, and bicycling.

The estimated cost of the project is \$150,000.

To Whom It May Concern,

This letter of support is written for Cahaba Medical Care Foundation's Fiscal Year 2017-18 application to improve recreational trails located on property owned by the Bibb County Board of Education located near the Cahaba River. The trail is located in an area near the Chamber of Commerce and Bibb County High School, and receives much use. Upgrades to the trails are long overdue, and will be welcomed and supported by the Bibb County Board of Education.

The Bibb County Board of Education will grant an easement in perpetuity for the use of the trails developed through the Recreational Trails Grant and for maintenance purposes. The Bibb County School District appreciates the partnership with Cahaba Medical Care in endeavoring to make improvements that will positively impact the quality of life for the residents of our community.

Your favorable consideration of the application submitted by Cahaba Medical Care Foundation will be so appreciated.

Sincerely,

Terry Duane McGee

RE: Official Letter of Support for Cahaba Medical Care Foundation

The City of Centreville supports the endeavors of Cahaba Medical Care Foundation for the ADECA Recreational Trails grant. The City has supported the work of that area before and will continue in the future. The trail runs behind the Chamber of Commerce and proceeds up to the Shayne Williams Park.

Respectfully,

Terry Morton, Mayor
City of Centreville

BIBB FOCUS GROUP

Cahaba Medical Care Foundation
405 Belcher Street
Centreville, AL 35042

January 5, 2017

To Whom It May Concern:

The Bibb Focus Group provides this letter of support to Cahaba Medical Care Foundation for the ADECA Recreational Trails Program Grant for FY 2017-2018. Let it be known that we leverage our support of this project. This project is comparable to efforts we have implemented in creating recreational activities for those with disabilities.

Your consideration in awarding this grant to Cahaba Medical Care Foundation will be highly appreciated.

Sincerely,

A handwritten signature in cursive script that reads "Nese Morgan". The signature is written in dark ink and is positioned above the printed name.

Nese Morgan, President
